-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. This action is responsive to RCE received on Dec. 19, 2006. Claims 21, 22, 52 and 53 are pending examination.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 21, 22, 52 and 53 are rejected under 35 U.S.C. 102(e) as being anticipated by Khalil et al., U.S. Patent No. 6,578,085 (referred to hereafter as Khalil).

As to claim 21, Khalil teaches a method of providing a communication service to a correspondent terminal that communicates with a mobile terminal, comprising the steps of:

    hunting binding information about the mobile terminal, the binding information being information which provides a correspondence between an IP address of the mobile terminal and an IP address of a foreign agent that is accommodating the mobile terminal and the binding information being transferred from a home agent of the mobile terminal to the correspondent terminal (see col. 4 lines 1-15, the binding information between the FA and the mobile device are transmitted from the HA to the correspondent terminal), and

processing and storing the binding information for the correspondent terminal (see col. 4 lines 12-15, the correspondent terminal stores in the cache the binding information); and

processing a data packet from the correspondent terminal to the mobile terminal based on the binding information (see col. 4 lines 12-15, the correspondent terminal forwards packets directly to the mobile device).

As to claim 22, Khalil teaches the method of claim 21 further comprises tunneling data packet (see col. see fig. 2).

As to claim 52, Khalil teaches a proxy correspondent node device to accommodate a correspondent terminal which makes a communication with a mobile terminal, comprising:

Means for hunting binding information about the mobile terminal, the binding information being information which provides a correspondence between an IP address of the mobile terminal and an IP address of a foreign agent that is accommodating the mobile terminal and the binding information being transferred from a home agent of the mobile terminal to the correspondent terminal (see col. 4 lines 1-15, the binding information between the FA and the mobile device are transmitted from the HA to the correspondent terminal), and

Means for processing and storing the binding information for the correspondent terminal (see col. 4 lines 12-15, the correspondent terminal stores in the cache the binding information); and

means for processing a data packet from the correspondent terminal to the mobile terminal based on the binding information (see col. 4 lines 12-15, the correspondent terminal forwards packets directly to the mobile device).

As to claim 53, Khalil teaches the proxy of claim 52 comprising means for transmitting a binding acknowledge message to the home agent which has a request to the home agent that subsequent binding information should be transmitted to the proxy correspondent node device (see col. 4 lines 12-15).

***Response to Arguments***

3. Applicant's arguments have been fully considered but are moot in view of the new grounds of rejection.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hussein A. El-chanti whose telephone number is (571)272-3999. The examiner can normally be reached on Mon-Fri 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ario Etienne can be reached on (571)272-4001. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
